SUMMARY

Software Engineer with about 3 years of experience building production web and backend applications, now specializing in AI application development and generative AI. Builds LLM-powered products using RAG, embeddings, semantic search, vector databases and AI workflows, backed by strong React, Node.js and REST API skills.

SKILLS

Generative AI: LLMs, Gemini API, Prompt Engineering, AI Application Development

RAG & Search: RAG, Embeddings, Semantic Search, FAISS, Pinecone, Document Processing, Chunking

Agents & Automation: AI Agents, Agentic AI, Multi-Agent Systems, Tool/Function Calling, n8n

Languages & Frontend: Python, JavaScript, TypeScript, React.js, React Native, Tailwind CSS, Vite

Backend & Data: Node.js, Express.js, REST APIs, Swagger/OpenAPI, Postman, PostgreSQL, MongoDB, Pandas

Tools: Streamlit, Pydantic, Git/GitHub, Nginx, RabbitMQ, Agile

EXPERIENCE

Software Engineer, sGate Tech Solutions Pvt. Ltd. | Nov 2023 - Present

- Build and maintain production web apps with React.js, JavaScript/TypeScript and Tailwind CSS, plus React Native mobile apps.
- Develop Node.js, Express.js and PostgreSQL REST APIs and integrate third-party services.
- Worked on Skart, a multi-platform logistics and booking system (Booking, Hub, PUD, Admin, BackOffice/Sales web platforms, Rider App and Booking App).
- Wrote Swagger API documentation, built a complete Postman collection from scratch and produced a PDF API reference.
- Diagnosed and fixed production and client-reported issues by finding root causes, and supported production releases.

AI / GENAI PROJECTS

HireFlow - Candidate Search & Evaluation | Python, Gemini API, RAG, FAISS/Pinecone, Streamlit, Pydantic

- Built a RAG-based app for semantic resume-to-job matching using embeddings and vector search, with Gemini-generated, explainable evaluations in a Streamlit recruiter interface.

ScamGuard AI - Scam Detection App | Python, LLM APIs, Streamlit | scamdetect.streamlit.app

- Built and publicly deployed an LLM-powered app that flags scam indicators in messages and explains them in plain language.

MindFlow AI - AI Chat Application | React, Vite, Tailwind CSS, n8n, REST APIs

- Built a responsive chat app connected to an n8n workflow via webhooks, with chat sessions, history and Markdown rendering.

EDUCATION & CERTIFICATIONS

- IBM Advanced Certification in Generative AI & Multi-Agent Systems (in progress)
- Full Stack Web Development, Masai School (2022-2023)
